THE AMERICAN COUNCIL OF ENGINEERING COMPANIES OF COLORADO: Phil and Debi Bush of CMIT Solutions of Denver announced the winner of the “Colorado Technology Makeover” at April 14’s Business Before Hours event hosted by the Greater Glendale Chamber of Commerce.

Marilen Reimer, the executive director of The American Council of Engineering Companies of Colorado, accepted the award on behalf of the company.

Prior to naming the winner, a panel of judges reviewed each applicant and assessed their IT situations.

Judges determined the winner based on criteria such as the degree of difference the new technology will have on the business and the overall benefit the business will gain from leveraging the technology.
